Why IRITECH?

IriTech, Inc. is one of very few iris providers who owns all in-house proprietary technologies vital for deploying any scalable end-to-end iris ecosystem. With more than 20 years of experience in iris recognition technology and top-ranked NIST¹⁾–proven algorithms, IriTech has been trusted by many prestigious clients. Our systems have been deployed in multiple and multisector large scale projects ranging from governments to corporates due to its exceptional performance in tough environment. IriTech is proud to be the partner of choice, leading the iris biometrics technology.

1) National Institute of Standards and Technology

Overview

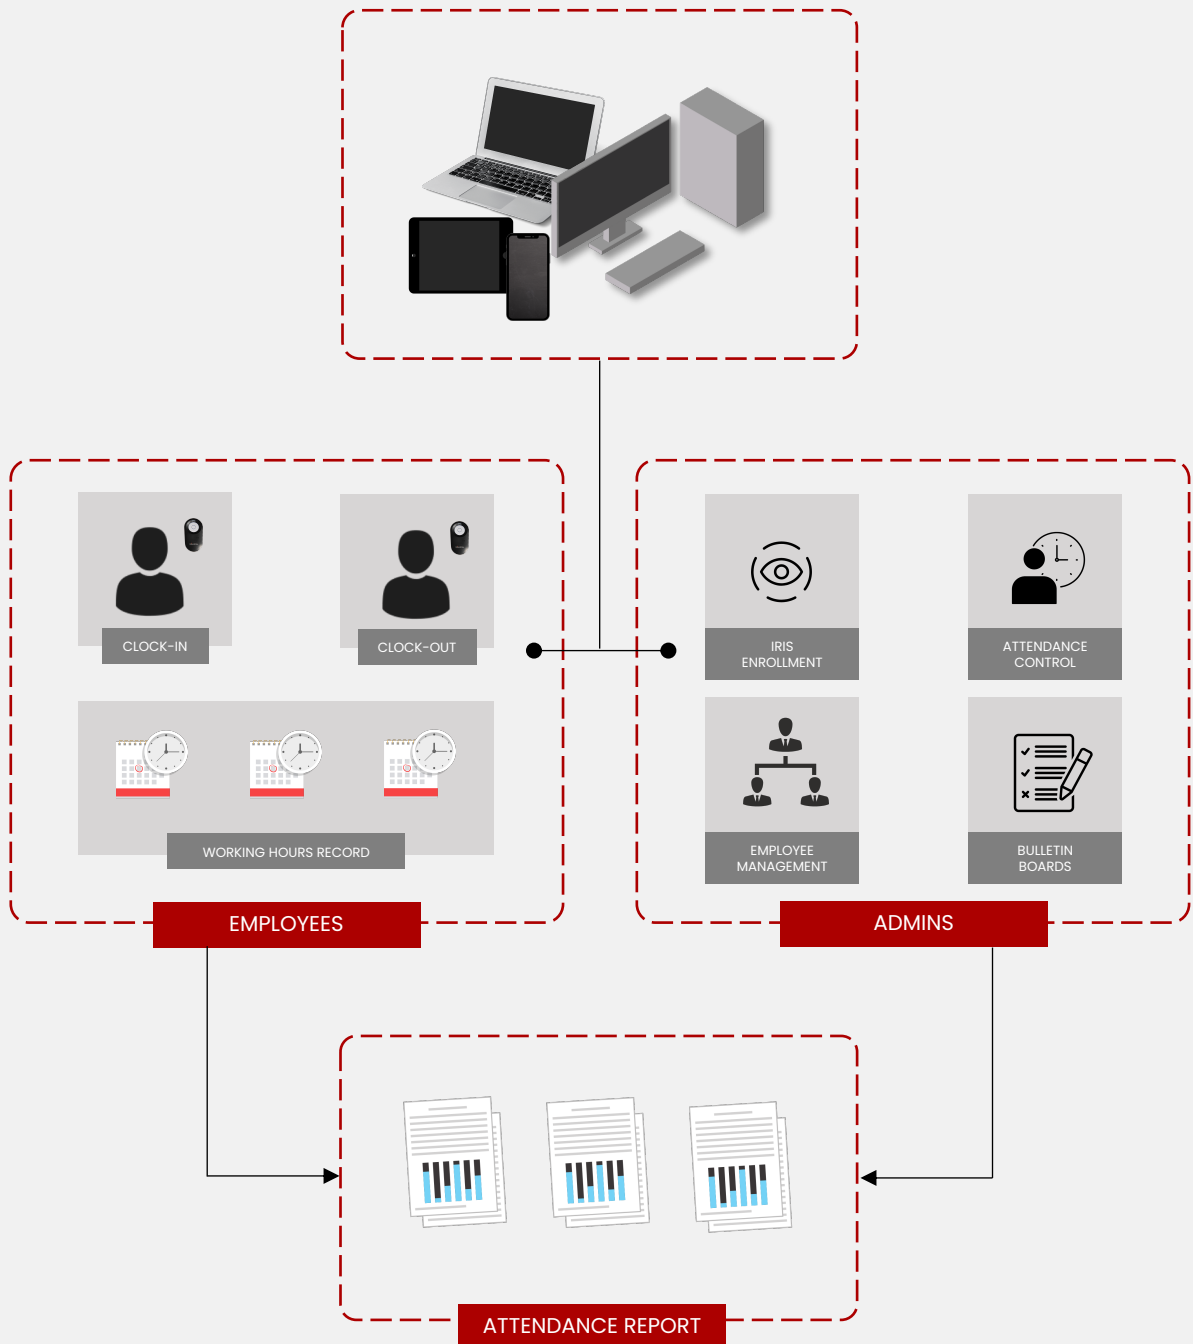

IriTracker is a full-control time & attendance system, developed by IriTech, Inc. Utilizing IriShield™, a portable yet powerful iris camera with on-board matching capability, IriTracker offers excellent solutions on time control, auto payroll generation, and efficient human resource management for enterprises.

With IriTracker, employers can take initiative in all types of work by eliminating manual inputs, time theft, and identity card exchange or buddy-punching.

IriTracker Client/Server is an added-value function which helps to centralize attendance data generated from different locations. With this comprehensive and ubiquitous solution, no matter where your employees clock-in or clock-out, all data will be centralized for a real time monitoring and efficient management.

IriTracker can be running on both Windows computer and Android tablet

Step 1: IriTracker software is installed to host device (PC, laptop, tablet).

Step 2: Employees 'iris template(s) are enrolled to host device.

Step 3: Employees clock in and out by verifying their iris(es) using IriShield camera plugging into PC.

Step 4: Data will be transferred to admin staff and generate different functional reports.

NOTE:

- If there are too many employees or employees work in different locations, IriTracker needs to be installed in different device in different locations connected to server. When employees check in and out, all data will be transferred to host device.
- If employees want to check in and out by their phone, they can install IriTracker software in their phone and plug IriShield camera in to verify their iris(es).

Key Benefits

- Eliminate time related disputes
- Maximize employee productivity
- Provide real time labor data
- Save management expense

≡ Increase Business Of Productivity And Efficiency

Running a payroll that involves tracking employee time and attendance on time cards and time sheets can be highly stressful. Especially for big companies with hundreds or thousands of staff or more; the management will become costly, overwhelmed and time consuming.

In order to stay competitive in today's tough economy, IriTracker software with auto payroll and time control accompanied with top-notch accuracy and high level of security will definitely help to increase your business of productivity and efficiency.

≡ Real Time Workforce Management And Accurate Payroll

There is no way that your staff can cheat on you about their work hours or steal from you. Therefore, IriTracker could help you to gain a complete and accurate visibility into your workforce by having real time access to time reporting.

Not only your payroll becomes streamlined with the real-time recording and auto processing but it also helps process accurate payroll to ensuring employees are paid properly.

≡ How Secure And Safe Is IriTracker?

IriTracker solution utilizing biometric function to authenticate employee identification through their unique biological features, iris template.

These iris templates are unique to every human being and cannot be replicated.

Moreover, iris scanning has been proved totally safe to human as it does not use any lasers, bright lights or hazardous technology.
